Mariarosaria Fragasso - Alice Bertazzoli

Federazione ANIE, member of Confindustria, represents the Electrical Engineering and Electronic companies operating in Italy.

With over 1,100 member companies, the ANIE system supplies technologies for public and private infrastructures in strategic markets such as energy, industry, building, infrastructures and transports.

Electrical Engineering and Electronic technologies represent the heart of the twin transition - green and digital. They are drivers of innovation and are essential for the modernization of existing infrastructure.

ANIE INDUSTRY FIGURES FOR 2023:

- 103 billion Euros of total turnover
- 420,000 employees
- 4% intra-mural R&D expenditure on total turnover

LIBO INDUSTRIAL SUPPLIES

STAND 2N51

Company profile

Li.Bo is a company that has been operating for over 35 years in the national and international market for industrial and electro-instrumental supplies, supplier of the main companies in the Oil&Gas sector. The company also distributes industrial tools and equipment and assists customers with engineering and maintenance services for the installation and use of these products. With the Li.Bo security division, the company sells work clothes, individual protection equipment and safety equipment, while Brico deals with wholesale and retail trade.

Unique Value Point

The various products and services offered meet all market needs in various product sectors. The wide range of items in stock allows rapid evasion of orders, rapid deliveries and reduced warehouse costs for the end user.

OVS**STAND 2H68****Company profile**

OVS is a company specialized in the design and construction of heat exchangers and pressure equipment for new green transition, Oil & Gas, chemical, petrochemical, fertilisers industries and refineries. Founded in 1973 as a small company by the Guerini family, OVS has developed considerable know-how over the years, focusing on the production of more complex and high-tech equipment, made of special materials for sophisticated and critical industrial processes. Today the brand OVS has a global presence thanks to the expansion of its sales force and the appreciation of foreign customers together with its strategic location in Vertova (Bergamo), close to Milan and the main North Italian seaports, that facilitates transport by water and land. OVS essence is also about understanding and supporting the Client in activities and assistance on site to guarantee good equipment operating conditions and Original Spare Parts supply.

Unique Value Point

OVS meets the highest industry standards and is a reliable partner because of its capacity in listening and understanding the real Client requirements as it's an end-to-end in-house production. Ethics and sustainability have a consistent role in our daily business: maintaining our focus on product quality, we are committed to adopting even more sustainable practices to pursue excellence and create a positive impact in the world of heat exchangers. We stand by our values as a corporate community and contribute every day to the success of our customers and the well-being of the people who work with us.

PANTANI GROUP

STAND 2169

Company profile

We collaborate with tube manufacturers, heat exchanger builders, and engineering firms, offering specialized processes that optimize our clients' production workflows. Our products save time and money while ensuring fast, precise, and punctual deliveries. Our main processes include:

- Bent tubes / Low-fin tubes / Corrugated tubes
- Finned tubes (L-LL-KL-G-Extruded)
- Custom tubes cutting

These processes are used in heat exchangers for the Oil & Gas, chemical/ petrochemical, geothermal, renewable energy, automotive, and many other sectors. Our Vision? "Energy taking shape with you!"

Unique Value Point

The values that guide Pantani Group are:

- Specialization: Expertise and excellence in every detail.
- Reliability: Dedication to keeping every promise, building trust through commitment and consistency.
- Collaboration: Joining forces, sharing ideas, and working in synergy to achieve common goals.
- Active listening and Customer care: Aligning with clients' needs and offering tailored solutions that meet their expectations and objectives.
- Punctuality: Respecting deadlines to ensure maximum efficiency.
- Flexibility: The ability to adapt to ever-changing contexts and challenges.
- We are a dynamic and growing company, combining solid roots with the unique value of the people who make it up.

Alessandro Martone

PETROSYSTEM

STAND 2L68

Company profile

PETROSYSTEM began its activities in 1978, in the Italian and worldwide market. Since then, we have been providing services to companies in the pipeline and instrumentation market, always seeking high-tech and proven solutions to ensure safety and productivity. Thanks to the technical and marketing knowledge and experiences of its founder Antonio Martone, began marketing products and can now sell products under the PETROSYSTEM brand. The constant selection of high-tech and high-quality products has always characterized PETROSYSTEM, leading to the consistent satisfaction demonstrated by our customers over the years. All the products we offer are always guaranteed and come with all the major certifications required (PED, ATEX, ASME, U-STAMP, etc). In addition to selling and marketing products, PETROSYSTEM began offering equipment maintenance services and, in the pipeline sector, started offering services for the installation, cleaning, and maintenance of oil pipelines, gas pipelines, and water pipelines. Today, PETROSYSTEM focuses on constantly satisfying customers by providing products and services with increasingly higher quality content.

Unique Value Point

Since 1978 Our activities have always been characterized by a high level of technology and quality, leading to an ever-increasing number of satisfied customers over the years. We are most experts in the market on pig signalling systems. We design and manufacture Pigs, Pig Signaller, Rapid Opening Closures and Launcher and Receiver Pig Traps, Plugging equipment such as inflatable bags & mechanical plugs, for low and high pressure. We offer the best price with highest quality level. Our experience and our knowledge are warranty of quality.

Operations Manager

PICCINI PAOLO

PICCINI PAOLO

STAND 2L56

Company profile

With a half-century experience and highly skilled personnel, Piccini Paolo Spa is able to plan and build all necessary equipment for the supply, transportation and storage of methane and biomethane, as well as filling stations. Our equipment is entirely built and tested in-house. That's why it is possible to develop any kind of customisation in order to satisfy the specific needs of Clients. The acquired know-how guarantees high quality standards, reliability, support and assistance. Investing resources in technology, research, safety and quality for the Italian and international market is the company strategy.

Unique Value Point

Methane is the most environmentally friendly source of energy of all fossil fuels: its use only releases carbon dioxide and steam. Biomethane contains at least 95% Methane and derives from the biogas produced by the anaerobic digestion of biomass in a carefully controlled environment or in landfills following the decomposition of waste or from gas from the gasification of biomass. The use of these two fuels is crucial for the transition to a more sustainable economy. By using Methane and Biomethane the most diverse needs within a home or in the service or industrial sectors or even for the production of heat, electricity and auto traction, can easily be met. Piccini Paolo Spa, with over 50 years of experience, is able to offer the right solution with the most advantageous offers for any type of customer.

The convenience of service, the reliability, safety and professionalism are just some of the reasons more and more customers choose Piccini, which prides itself in offering the best solutions in terms of safety and trust.

Contact

🏠 Via Adriano, 101
20128 Milano (MI)
☎ +39 02 262351
✉ info@raci.it
🌐 www.raci.it

Company profile

Raci, founded over 70 years ago and based in Milano - Italy, is a leading company in the design and production of spacers, patented in the 70's and 100% made in Italy. Raci is certified ISO 9001 and ISO14001. Raci spacers are a simple but very effective solution to protect a carrier pipe that has to be pushed or pulled into a casing pipe. The carrier pipe can be of any material and can carry any fluid (water, gas, oil, sewage, other). Thanks to a highly qualified team and rigorous quality control, Raci ensures reliable and customized solutions, meeting the specific needs of clients.

Unique Value Point

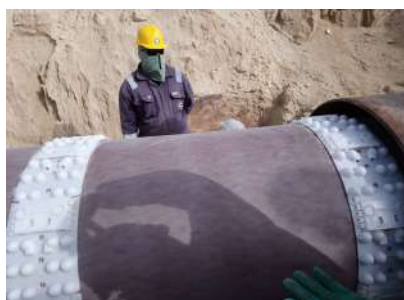

Raci spacers are simple but very effective solution to:

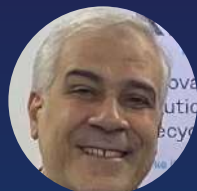

- Protect the anti-corrosion coating of the pipe if it is made of steel
 - Avoid damages on pipe surface (scratches/incisions)
 - Allow easier and faster insertion due to the lower coefficient of friction
- Raci spacers are all:

- Modular: just change the number of interlocking segments to build a collar for any diameter pipe
- Entirely made of plastic material, without fixing bolts (no possible electrical bridging of bolts or metal parts between the two pipes)
- Available with various skid heights
